Global health is fashionable. It provokes a great deal of media, student, and faculty interest, has driven the establishment or restructuring of several academic programmes, is supported by governments as a crucial component of foreign policy,¹ and has become a major philanthropic target. Global health is derived from public health and international health, which, in turn, evolved from hygiene ...

Towards a common definition of global health - The Lancet

Limited data exist on consumer beliefs and practices on the role of omega-3 fatty acid and vitamin D dietary supplements and health. For this reason, the Global Health and Nutrition Alliance conducted an online survey in 3 countries (n = 3030; United States = 1022, Germany = 1002, United Kingdom = 1006) of a convenience sample of adults (aged 18–66 years) who represented the age, gender, and ...
