Pulp And Paper Mills
A pulp mill is a manufacturing facility that converts wood chips or other plant fiber source into a thick fiber board which can be shipped to a paper mill for further processing. Pulp can be manufactured using mechanical, semi-chemical, or fully chemical methods (kraft and sulfite processes).

Pulp mill - Wikipedia
Pulp, paper, and paperboard mills in the United States are a world leader in the production of pulp and paper and are one of the nation's largest industries. Pulp and paper manufacturing can also be very hazardous due to massive weights and falling, rolling, and/or sliding pulpwood loads. Workers may be struck or crushed by loads or suffer lacerations from the misuse of equipment, particularly when machines are used improperly or without proper safeguards.
