### Study Guide For Pnet

Ewing's Sarcoma (ES) and Peripheral Neuroectodermal Tumor (PNET) are part of a spectrum of neoplastic diseases known as the Ewing sarcoma family of tumors. These diseases are associated with malignant small-cell tumors that can be found both in the bone and soft tissues of the extremities, but can also present in the axial skeleton.

### Ewing's Sarcoma/Peripheral Neuroectodermal Tumor ...

The first treatment for PNETs is surgery, if possible. The goal of surgery is to obtain tissue to determine the tumor type and to remove as much tumor as possible without causing more symptoms for the person. People with PNETs usually receive further treatments. Treatments may include radiation, chemotherapy, or clinical trials.
