registration of FSUIPC4 has no bearing on the local FSX PC support of FSUIPC-interfacing programs (support for Networked clients of WideFS does however still need purchase of the WideFS key). 2. The main part of FSUIPC4, and the one which actually justifies it as a payware add-on, are the user features which is the subject of this document.

Ok. You can do that all through the Calibration of the controls Ailerons and Elevators. Don't disable controllers in the Sim, don't assign in FSUIPC, for now at least. Read the chapter in the User Guide on Calibration, and follow the numbered steps there. Then make response curve adjustments in the Slopes option there until you get a good result.

Just delete the FSUIPC4.DLL file from the Flight Simulator X Modules folder.

Uninstalling FSUIPC is covered in the User Guide which can be found in the FSX/Modules/FSUIPC Documents folder.

Not sure why you'd want to remove it though, because some add ons need it to work properly.
